Finding E-articles in LIS & ARM: WORKSHEET

UTL website:  onesearch.library.utoronto.ca

1. **Review:** Finding known articles with an ARTICLE SEARCH
   - “Trust in libraries and trust in most people: Social capital creation in the public library”
   - “Reaching out, reaching in: A preliminary investigation into archives’ use of social media in Canada”
   - “Mobile wellness application-seeking behavior by college students” from Library & Information Science Research 37 (3): 201–208

2. **Review:** Finding a specific e-journal with a CATALOGUE SEARCH
   - Find the journal Library & Information Science Research – this search brings you to the catalogue record for the online version of this journal, with links to the fulltext.

3. **Looking up a journal in Ulrichsweb to see if it is peer-reviewed**
   - Catalogue search: TITLE = Ulrichsweb
   - Advanced search in Ulrichsweb: TITLE = “Archives and records”

**Searching in Library Literature & Information Science Fulltext**

**Q1:** How many recent articles (2010–2017) are there with the word blog in the title? Try the search again for the same time period using the term blog*. What differences do you see between the two searches? From the results page, can you find a way to display more than 10 results at a time?

**Q2:** Using the default search (Select a field – optional), look for peer-reviewed articles, any year, on the topic of archives and war. What are some subjects of the articles you find? (Hint: Articles have subject tags listed in the results list).

**Q3:** Look for some articles on the topic of current trends and issues in the provision of reference services in university libraries. Give a title of one that looks promising. What subjects come up in the articles you find? (Hint: ALWAYS start off with a broad search, not a subject search).

**Q4:** How many articles can you find from each of these journals? What is the most current issue of the journal available in Library Literature & Information Science Fulltext? (Hint: Search in different fields, and use different SORT options).

Benjamin Walsh (Fall 2017)
MORE ABOUT SUBJECTS

USING A THESAURUS

Demonstration:
- Look up the term minorities
- Look up the term freedom to read

USING A LIST OF SUBJECT TERMS

Demonstration:
- Look up the term academic libraries

Searching in Library and Information Science Abstracts (LISA)

LOOKING FOR ARTICLES BY AN AUTHOR

Demonstration:
- AU = Michael Paulus
- AU = Wendy Duff

LOOKING FOR AUTHORS IN AN AUTHOR BROWSE or INDEX LIST

Demonstration:
- Duff, W

LOOK UP JOURNALS

Demonstration:
- Look up Archivaria
- Look up American Archivist

LOOK UP SUBJECTS IN A THESAURUS

Demonstration:
- Look up senior citizens

LOOK UP SUBJECTS IN A SUBJECT LIST

Demonstration:
- Look up senior citizens
